

FACTS AND FIGURES

- GAFSP is a **\$1.6 billion multilateral financing mechanism** that supports resilient and sustainable agriculture systems through a range of public and private investment tools such as grants, technical assistance, concessional loans, blended finance, and advisory services across the entire value chain.
- GAFSP is collectively governed by agricultural development stakeholders –donors, recipient countries, civil society organizations, regional and multilateral development banks (*see: <https://www.gafspfund.org/governance>*) – to improve the lives of smallholder farmers and their families.
- **GAFSP donors include** Australia, the Bill & Melinda Gates Foundation, Canada, Germany, Ireland, Japan, the Republic of Korea, the Netherlands, Norway, Spain, the United Kingdom, and the United States.
- GAFSP's **US\$1.6 billion portfolio** consists of \$1.3 billion in public sector grant funding, **\$330 million** in agribusiness investment projects, and **\$13.2 million** to support producer organizations.
- **Over 13.4 million** smallholder farmers and their families have benefited from GAFSP-funded projects, including 5.6 million (42%) women.
- **80%** of public sector projects directly address climate change.
- **62%** of projects are creating economic opportunities through both on- and off- farm jobs.
- **97% of GAFSP** public investment projects contribute to the development of rural infrastructure
- Approximately **1.2 million people** have improved nutrition through increased access to nutritious food and dietary diversity.
- **US\$252 million** in improved incomes has been generated for farmers each year.
- On over **250,000 hectares** of arable land, new agricultural technologies were adopted.
- Over **2,000 kilometers** of public roads were constructed and/or renovated, connecting smallholders with new markets.
- Over **370,000 hectares** of productive agricultural land were provided with new or improved irrigation and drainage services.
- Over **1,600 water user associations** were created to address current and impending water insecurity.
